

VERSION	DATE	WHAT'S NEW
V0.1.4	March 4, 2020	<ul style="list-style-type: none"> • Improved the state of charge estimation algorithm • Added the function to restart the BMIC chip when the sampling voltage exceeds valid voltage • Resolved the parallel connection issue • Resolved the firmware version parsing issue • Resolved the short-circuit protection issue
V0.1.1	December 5, 2019	<ul style="list-style-type: none"> • Added protection states and warning codes into the protocol • Resolved the battery address allocation issue
V0.1.0	November 5, 2019	<ul style="list-style-type: none"> • Added the function to put parallel connected batteries into shelf mode
V0.0.9	October 29, 2019	<ul style="list-style-type: none"> • Improved the state of charge estimation algorithm • Added the function to save the battery address after address allocation

V0.0.7	August 22, 2019	<ul style="list-style-type: none">• Initial release
